EDUCATION

University of Pennsylvania (Part-time)

Master of Computer and Information Technology (3.7/4.0 GPA)

Coursework: Big Data Analytics, Technology Ethics and the Legal Landscape

Philadelphia, PA

December 2026

University of Southern California

Master of Science in Integrated Design, Business and Technology (4.0/4.0 GPA)

Los Angeles, CA

August 2023

EXPERIENCE

Taiwan Semiconductor Manufacturing Company (TSMC)

Taichung, Taiwan

Product Manager/Engineer Intern

July 2025 – August 2025

- Conducted stakeholder interviews to understand end-to-end air pollution source-tracing workflows, identifying inefficiencies driven by fragmented data sources and manual information handoffs
- Deployed a FastAPI service to centralize air pollution source-tracing data from multiple platforms into in-house software, reducing manual data-gathering time by 40% and enabling faster, more consistent analysis across fabs

Stealth Company - B2B AI SaaS Startup

Remote

Product Manager

May 2023 – October 2023

- Defined product roadmaps and KPIs using market research and partner collaboration, enabling a go-to-market strategy targeting 200,000 potential users
- Deployed a fine-tuned LLM for AI-driven customer support, achieving 95% response accuracy and enabling scalable 24/7 support without headcount increases

Amazon

New York, NY

User Researcher (UX) Intern, Amazon Connect Team

June 2022 – September 2022

- Interviewed 10 stakeholders and 7 solutions architects, gathering user journey and workflow insights, then synthesized findings into a roadmap, securing alignment from 20+ leaders and stakeholders

Internet Brands

El Segundo, CA

Associate Product Manager/Product Analyst

January 2020 - December 2021

- Managed and launched a SaaS product segment through the full software development life cycle, deployed on a platform with 50M+ annual visitors, opening new market segments and projecting \$80M YoY revenue growth
- Executed 150+ usability tests, A/B experiments, and competitive analysis, driving 10+ product redesigns, increasing conversion by 20%, and reducing bounce rates by 35%
- Led cross-functional teams in agile, prioritizing features by impact, aligning with strategic goals, and cutting project completion time by 50% through design thinking and improved collaboration
- Designed and iterated high-fidelity prototypes and PRDs with cross-functional teams to migrate a \$10M product in-house, reducing integration risks and eliminating third-party dependencies

PROJECTS

E-commerce Late Order and Warehouse MySQL DataBase Analysis

- Built Tableau dashboards with distribution maps and profitability analysis, using SQL to assess warehouse data and identify underperforming locations for potential closure
- Recommended discontinuing 5 non-profitable products and reallocating resources to more profitable ones, which led to a projected 10% increase in revenue and improved inventory management
- Analyzed order fulfillment data to uncover a process gap, leading to an 8% reduction in late orders

SKILLS

Technical: Python (Pandas, NumPy, Scikit-learn, PyTorch), HTML/CSS/JS, Excel (PivotTable, VLOOKUP), SQL

Product: Feature Prioritization, Agile/Scrum, Stakeholder Alignment, UI/UX, Go-To-Market, Data Analytics, A/B Testing

Tools: Jira, Figma, Excel, Google Analytics, Tableau, Adobe Target, Confluence

Language: Chinese (Fluent)
